

PETRIFIED WOOD SINK

Nowadays, the customers prefer the products made of the natural materials more and more. And the plumbing fixtures is no exception of this trend. You can find the wide range of sinks made of marble, onyx, basalt and other materials available on the market today. But, one of the most interesting examples of our products are the sinks made of petrified wood.

These sinks are made of a unique material, which has been formed for the millions of years. As a rule, this material is teak wood. Under the influence of time and weather conditions, the wood has lost its natural moisture (which was replaced by the various mineral compounds) and became rigid. As a result, this material is in no way inferior to stone. In order to produce a sink, the blanks of 15-16 cm in length are cut out. So, the future sink comes out of these blanks. It has natural colour of the petrified wood and isn't painted.

Petrified wood has unique physico-chemical characteristics. In fact, it is an incomparable decorative material that combines the rigidness of stone and the natural beauty of wood at the same time. Therefore, it perfectly fits for producing the sinks. Featuring the unforgettable

PECULIARITIES OF PETRIFIED WOOD SINKS

Like any other plumbing fixtures, the fixtures made of natural materials has its own peculiarities.

First of all, gentle detergents should be used for cleaning such sinks.

Secondly, you have to think of over the type of support for such a sink as it weighs a lot. You can use a tabletop or a forged stand for this purpose.

ADVANTAGES OF PETRIFIED WOOD SINKS

The sinks made of petrified wood are outstanding not only from the point of view of their physical features, but are just gorgeous, extremely beautiful and eye-attracting. Their advantages in daily use are the following:

- They are durable;
- Are resistant to physical and chemical impact, i.e. they stay resistant to the abrasive materials (except metal brushes), detergents or disinfectants.
- Have long life time;
- Don't suffer from temperature fluctuations and humidity changes,
- Uniqueness of color combinations and shapes,
- Are environmentally friendly,
- Compatible with any other materials,
- Have wide range of use.

Our sinks can be easily fitted into the interiors both of an apartment or a country mansion.

As well as that, the sinks made of relic stones will perfectly complement the atmosphere in arbors, patios and gardens. For example, in the barbecue area or in the process of creating the
